

ENVIRONMENTAL IMPACT REDUCTION HIGHLIGHTS

REDUCTION IN ELECTRICITY CONSUMPTION BY 38%

In three years, 2019 to 2022, Cambridge has been able to reduce its overall office footprint by 21,728 sf, which in turn is a reduction in electricity consumption of 254,220 kWh per year.

REDUCTION IN EMPLOYEE COMMUTING MILEAGE BY 74%

Since 2019, Cambridge has been able to reduce employee commuting mileage by approximately 455,700 miles per year, reducing CO2 emissions by 155,393.7 Kg/mile.

REDUCTION IN GREENHOUSE GAS EMISSIONS BY 29%

For more than two years, from January 1, 2020 until August 1, 2022, Cambridge has lowered our greenhouse gas emissions related to our business travels by 29%.

The GHG Protocol Corporate Standard, revised edition, is the tool being used to calculate Cambridge GHG emissions inventory. The GHG Protocol Corporate Standard provides standards and guidance for companies on preparing a GHG emissions portfolio.
